BirchStreet Inventory Management with AccuBar

Combines all of the deep capabilities of BirchStreet along with AccuBar's beverage management and barcode scanning process.

Enables organizations to capture and maintain accurate inventory data across multiple locations and provide real-time isibility to perpetual inventory levels. This helps in decreasing high inventory carry cost, spoilage and shrinkage while reducing critical stock outages.

It It also integrates with BirchStreet's Checkbook Drilldown feature to charge outlets upon fulfillment, allowing properties and enterprises to accurately track food and beverage costs by outlet. Streamlined replenishment processes with easy set-up of par values for items with color-coded alert notify users as inventory items reach pre-established reordering levels. Further enhancements include automated PO generation as well as planned purchases.

Senior management and users will have on-demand knowledge of their on-hand inventory in each of their outlets on their desktop, laptop or mobile device. BirchStreet Inventory Management with AccuBar fully integrates with POS, creating an end-to-end business system.

Key Retail Item Management

- Optimize Inventory and reduce waste by 2-5%

- Fast and accurate count management with mobile barcode scanners improves productivity gains up to 30%
